

8100BS

DIRECT DRIVE BUTTON SEWER

There's no need to sew a button by hand or with a manual machine when you have the speedy 8100BS button sewer now equipped with direct drive technology. You can simply program a 2 or a 4-hole button and is suitable for apparel production, dry cleaning and laundry applications.

For sewing buttons on all types of garments, the 8100BS with direct drive technology allows you to set the speed of the machine, the stitch count, and number of button holes, offering the whole package. A quieter, precise sewing experience and outstanding build quality.
